

Legacy Premier PVCu Sliding Sash Window

Legacy Premier has been carefully developed for projects where authentic period detail matters. Premier brings together five of the most authentic sash window features - mechanical joints, run-through sash horns, a slim midrail, and deep bottom rail, Heritage hardware - all included as standard.

Each feature has been chosen to replicate the character and craftsmanship of traditional timber sash windows, from the elegant joinery details to the sleek sightlines of the midrail. Yet behind the heritage look lies the strength, energy efficiency, and low maintenance of modern PVCu.

Perfect for conservation areas and period homes, Legacy Premier offers the character of timber with the practicality of modern British manufacturing, making it easier than ever to achieve beautiful, lasting windows that homeowners love.
